Education

Rajasthan Technical University

Jaipur, India

B.Tech in Computer Science & Engineering (Artificial Intelligence)

Aug 2023 – July 2027

CGPA: 8.0/10

Technical Skills

Languages: Python

Frontend & Web: Next.js, Flask, FastAPI

Databases: PostgreSQL, MySQL, Database Design

AI/ML: Machine learning models, Generative AI, Pandas, NumPy, Matplotlib

Tools & Cloud: Git, GitHub, Docker, Google Cloud Platform, Oracle Cloud Infrastructure

Core CS: Data Structures & Algorithms, Software Architecture, UML Design

Experience

Full Stack Intern

Feb 2026 – Present

Hibiscustech GR Private Limited

Remote

- Contributing to development of scalable full-stack applications using modular architecture and production-grade engineering practices
- Strengthening frontend engineering expertise with emphasis on performance optimization, maintainable components, and clean data flow design

Advanced Software Engineering Virtual Intern

Dec 2025 – Jan 2026

Walmart USA (Forage)

Remote

- Engineered a novel heap data structure improving package routing efficiency in large-scale logistics scenarios
- Solved complex technical challenges spanning data structures, system architecture, and relational database design

Salesforce Intern

July 2024 – Aug 2024

Rapthot Technologies

Jaipur, India

- Learned Salesforce platform fundamentals including workflow automation, data modeling, and CRM architecture concepts
- Developed Hotel Management System and Bank Management System to apply full-stack and database design principles in practical scenarios

Projects

AI Content Modernization Platform | Next.js, Flask, PostgreSQL, Google Cloud, Perspective API

- Integrated Google Perspective API via GCP with backend services enabling automated content assessment and intelligent rephrasing
- Designed responsive frontend architecture using Next.js with scalable components; currently extending functionality and performance

NeuroScan AI — Medical Image Diagnosis | Python, TensorFlow, Docker

- Developed a medical image-based classification system achieving high diagnostic accuracy using TensorFlow
- Containerized the application using Docker to ensure reproducible deployment and scalability
- Implemented lightweight interface for image upload and real-time predictions

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional	Oct 2025
Oracle AI Vector Search Certified Professional	Oct 2025
Walmart USA Advanced Software Engineering Virtual Experience	Jan 2026

Leadership & Achievements

-
- Led technical teams in national hackathons including SBI Life Hack-AI-Thon and EY Techathon 5.0
 - Volunteered at Smart India Hackathon 2025 Grand Finale supporting innovation teams
 - Maintain 15+ active GitHub repositories across AI and full-stack development
